

# Application Security Services

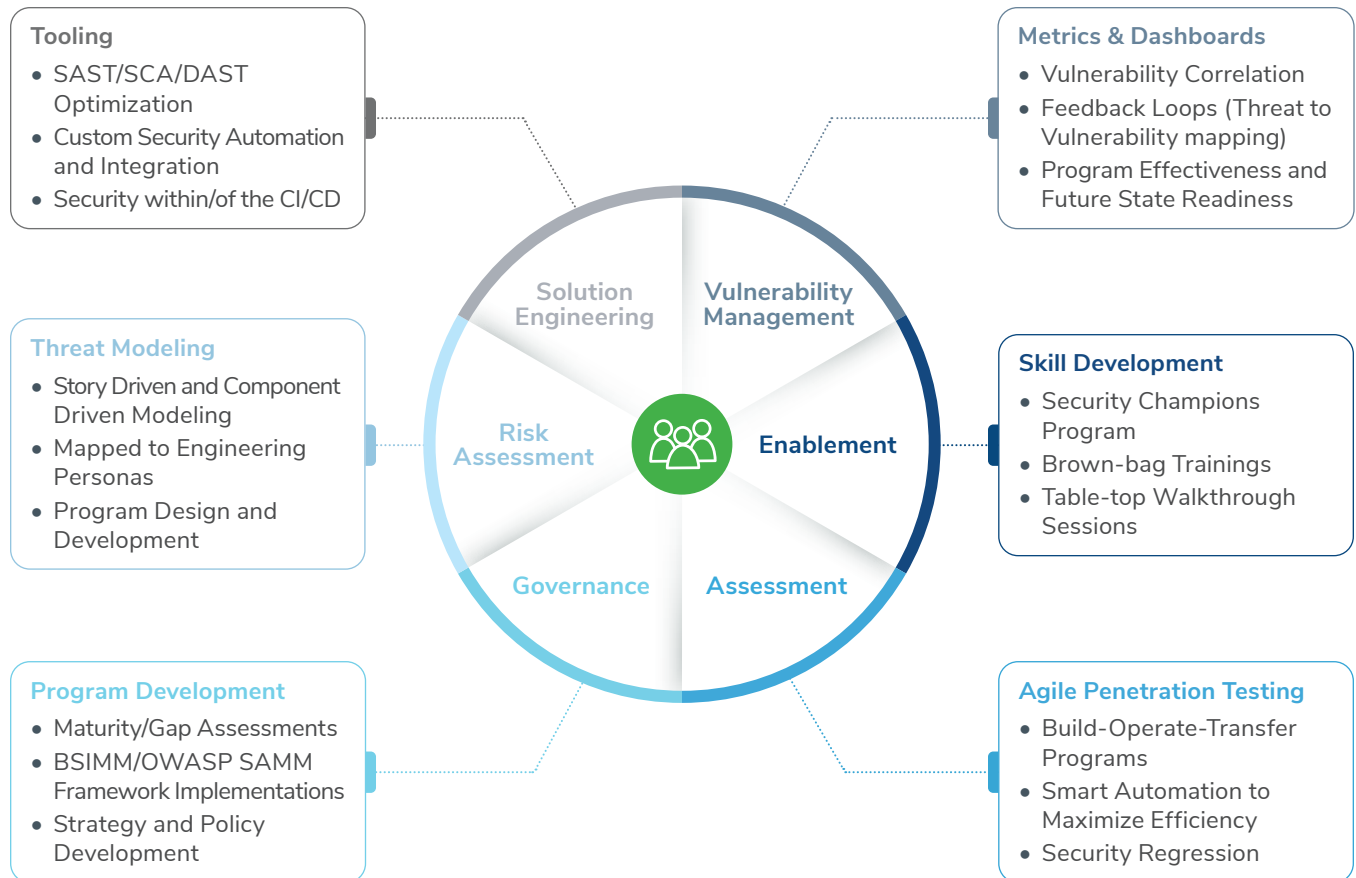

# Application Security Services

**Build it better and make it secure: Kroll’s product security experts enhance your software security program with both strategic and tactical security services catered to your team’s culture and needs, merging engineering and security into a nimble unit.**

Our product security experts assist clients in all the elements required to design and implement a successful application security program. We’re not just helping your team implement static application security testing (SAST) and/or dynamic application security testing (DAST) tools—our goal is to help organizations adopt programs and capabilities that will enable them to effectively manage the security of their application portfolios while being nimble enough to address changes in business needs, technologies and operating environments.

## Responding to a Security-Focused Software Market

Kroll understands that building and maintaining a successful application security (“appsec”) program is not for the faint of heart. A good appsec program requires sound strategy and supporting processes to help guide software product teams in practicing secure coding practices, investing in the right security tools to reduce organizational risk, and in building programs to measure the effectiveness of application security controls. This may require a complete culture shift within your engineering and security teams to embrace a more secure software development initiative.

## AppSec Services: Scalable to Every Project

**Application security is not a one-size-fits-all endeavor, so scalability is critical, especially as your program grows.**

Kroll experts provide software product teams with the tools, processes, guidelines and confidence necessary to offer innovative products to their internal and external customers without exposing them to security vulnerabilities.

Whether your organization is a tiny seed-stage startup, a large enterprise organization or anything in between, our appsec program can be tailored to meet the needs and complexity of your project. Kroll's team of appsec experts has the experience and know-how to execute appsec program engagements of any size.

### Real Appsec Use Cases

#### Application Security Program Development

##### Large North American Bank

- Built and operationalized appsec program
- Defined processes and metrics (KPIs) on:
  - Developed and implemented security champions program
  - SAST/DAST/SCA
  - Application intake, prioritization and onboarding
  - Vulnerability management

##### Financial Services

- Improved and developed methodologies for internal penetration testing
- Risk profiling and threat modeling
- Trained internal teams on web app assessments and threat modeling

##### Fintech Provider

- Enabled engineering team to launch products that are secure by default
- Developed and implemented security champions program
- Developed DevSecOps capabilities
- AppSec governance and process improvisation

##### Major Entertainment Provider

- Helped build and scale appsec program
- Application intake, triage and onboarding
- Security champion training
- Vulnerability management solution integration with CI/CD
- Created feedback process to resolve challenges and program improvement

##### Fortune 500 Energy & Utilities Provider

- Developed a software security strategic roadmap
- Assessed current state across global business units
- Short-/long-term goals (three-year roadmap)
  - AppSec governance
  - DSO capabilities
  - AppSec engineering support

## GLOBAL CYBER EXPERTISE

Many of our cyber professionals bring years of unique experience from their former service with large enterprises as well as law enforcement and regulatory agencies:

- Federal Bureau of Investigation (FBI)
- Interpol
- U.S. Department of Justice (DOJ)
- Securities & Exchange Commission (SEC)
- U.K. Intelligence and Policing
- U.S. Department of Homeland Security (DHS)
- U.S. Secret Service (USSS)
- U.S. Attorney's Office
